

June 2026 – March 2027

13 Use Cases | 3 Stakeholder Groups | 10-Month Plan

Overview

SmartLearners.ai is an AI-powered, CBSE-aligned learning platform (Class 6–12) that automates assessment checking, delivers personalised practice, and generates data-backed reports for students, teachers, and school management. This roadmap outlines how your school plans to implement and scale SmartLearners across 13 use cases starting June 2026.

Platform capabilities used

- AI exam analysis — upload question papers and answer sheets; AI corrects, marks, and generates student-wise and question-wise reports
- Personalised practice engine — assigns targeted practice from weak chapters identified through assessments
- AI chatbot with step-by-step solutions and concept videos for self-study
- Shareable PDF reports for parents and management
- JEE / NEET Foundation and competitive exam modules for Class 6–12

Three stakeholder groups

- Students — remedial, enrichment, special needs, competitive exam, revision, and catch-up programmes
- Teachers — CT & AI worksheet automation, lesson plans audit, and Teacher aptitude-assessment
- Leadership — PTM reports and notebook/teacher quality audits

Implementation Plan – June 2026 to March 2027

[illegible]

Key Milestones

Jun 2026	All 12 core use cases launch simultaneously
Jul 2026	First revision window — pre-unit test
Aug 2026	New student & teacher use cases begin; post-summer catch-up
Sep 2026	Revision window + first PTM with AI reports
Dec 2026	Revision window + sample paper checking begins (Gr 10 & 12)
Feb 2027	Pre-board revision window; all 12 use cases active
Mar 2027	Annual impact report + Year 2 planning

1. Aptitude test checking — Admission Cell Jun 2026

Upload admission aptitude papers with answer key. AI reads handwritten responses, auto-grades, and produces student-wise and question-wise reports within minutes.

Jun Wk 1–2 Subscription setup; admission staff onboarding	Jun Wk 3 Pilot with one batch; verify AI accuracy
Jun Wk 4 Full deployment for all admission rounds	Ongoing Routine use every cycle; no manual correction

2. CT & AI worksheet assignment and checking Jun 2026 — ongoing

Assign CT & AI worksheets to students applicable from June onwards. AI returns concept-level feedback per student, reducing teacher correction load from day one.

Jun Wk 1 Map CT schedule to platform upload calendar	Jun Wk 2–3 Train all class teachers on batch-scan workflow
Jul First full CT cycle; measure time saved vs manual	Ongoing PDF reports shared with parents each CT round

3. Home & practice assignments — Step Up (remedial) students Jun 2026 — ongoing

Personalised practice engine for Step Up students. Weak chapters auto-assigned as home practice. AI chatbot provides step-by-step solutions and concept videos.

Jun Wk 1 Identify remedial list; create learner profiles	Jun Wk 2 Parent orientation — supporting home practice
Jun Wk 3 First home-practice module; monitor completion	Ongoing Weekly review; adjust difficulty via AI insights

4. Interactive practice — special needs students Jun 2026 — ongoing

Self-paced, low-pressure practice using the AI chatbot. Shorter sets, repeated attempts, and video-linked concept explanations support differentiated learning.

Jun Wk 1 Map learning goals with special educator	Jun Wk 2 Configure low-difficulty, shorter practice sets
Jul Supervised sessions; gather student feedback	Ongoing Termly review with special educator

5. Notebook & teacher correction quality audit Jun 2026 — ongoing	
<i>Periodic AI-assisted audit of student notebook work and teacher-corrected assignments. HOD reports maintain uniform quality standards across classrooms.</i>	
Jun Wk 1 Define audit criteria and sampling frequency	Jun Wk 2 Train HODs on upload and report interpretation
Jul First audit round; aggregate report to principal	Ongoing Monthly audit cycle embedded in school calendar

6. Revision before exams Jul / Sep / Dec / Feb	
<i>Structured AI-assisted revision in four pre-exam windows. Students upload past test answers; AI identifies gaps and assigns targeted practice from weak chapters.</i>	
Jul 2026 Pre-unit test revision — first cycle on platform	Sep 2026 Half-yearly revision — AI weak-area identification per student
Dec 2026 Pre-annual exam intensive revision programme	Feb 2027 Pre-board revision for Gr 10 & 12

7. Sample question paper checking — Grade 10 & 12 Dec 2026 – Feb 2027	
<i>Board exam prep season. Teachers upload sample papers with marking schemes; AI grades bundled answer sheets and generates class-level insight reports for focused revision.</i>	
Dec Wk 1 Prepare answer-key templates for core board subjects	Dec Wk 2 Subject teacher briefing — Maths, Science, English, SST
Jan First sample paper round; refine workflow	Feb Weekly cycles; parent reports; pre-board analysis

8. Competitive exam preparation — JEE / NEET / Olympiad Aug 2026	
<i>Students of Grade 6 to 12 targeting JEE, NEET, or Olympiads can use difficulty-scaled question banks and concept videos beyond the CBSE curriculum.</i>	
Aug Identify interested students; create competitive prep group	Sep Assign JEE/ NEET Foundation modules to Grade 11 and 12/ Olympiads to Grade 6 to 12 Monthly target-setting
Oct+ Monthly progress review; share with parents and career counsellor	Ongoing Track competitive performance alongside CBSE scores

9. Enrichment practice — high achievers Aug 2026	
<i>Advanced and cross-chapter problem sets for top-performing students. Talent identification becomes data-backed — students consistently scoring well can be flagged for competitions.</i>	
Aug Identify top performers from Jun–Jul CT data	Aug Wk 3 Assign advanced chapter sets; introduce enrichment cohort
Oct	Ongoing

Review engagement; use data for competition team selection	Quarterly enrichment cohort review
--	------------------------------------

10. Post-holiday concept catch-up Aug, Oct, Jan — first week back	
<i>After summer, Diwali, and winter breaks, a structured AI-driven catch-up module in the first week surfaces gaps through a diagnostic, then assigns personalised practice to bridge them.</i>	
Aug Wk 1 Post-summer diagnostic; assign gap-fill modules	Oct Wk 1 Post-Diwali catch-up for affected grades
Jan Wk 1 Post-winter break catch-up; focus on Gr 10 & 12	Review Compare catch-up completion rate vs prior year performance

11. Data-driven lesson planning Audit Aug 2026	
<i>Use question-wise CT analysis generated by the platform to inform lesson planning. Teachers see exactly which concepts the class struggled with and can re-teach targeted topics before moving forward.</i>	
Aug Train teachers to read question-wise class reports	Sep Introduce 're-teach before advancing' protocol in lesson plans
Oct HOD review: is CT data influencing lesson coverage?	Ongoing Embed in fortnightly departmental meetings

12. Teacher Aptitude -assessment	
<i>Assigned Teacher / HR department upload written aptitude of teachers during recruitment for AI feedback, identifying potential gaps in their written test.</i>	
Sep Pilot with candidates in ongoing recruitments	Dec Implement for recruitment drive
Mar link platform insights to training needs / recruitment decision	Policy Keep individual results confidential; aggregate only for recruitment decisions

13. PTM reports analysis Sep, Jan, Mar — after each PTM	
<i>Systematically use the platform's shareable PDF reports before every Parent-Teacher Meeting. Parents receive data-backed evidence of their child's progress, weak areas, and improvement over time.</i>	
Sep First PTM using AI reports; train teachers on report walkthrough	Jan Second PTM cycle; include revision performance data
Mar Year-end PTM: full progress trajectory since June	Policy Standardise report format across all grades and sections

.....End of implementation plan
