

Mock Exam Performance Report

Teacher dashboard analysis · 40 mock exams · deep-dive on the most recent (9–11 Jun 2026)

Executive summary

Deboshree Ghate's mock-exam programme is active and well-subscribed: **40 mock exams** have been set, of which **35 received submissions** totalling **1,841 attempts**. Across all active exams the participation-weighted average is **74.8%**, and on the recent papers **92–97% of students clear the 40% pass line** — a healthy baseline. Performance is strongest in **Science (76.6% weighted)**, close behind in **Maths (73.2%)**, and weakest in the small **Physics (Class 12)** set. The clearest concern in the recent window is **Class 12 Mathematics (11 Jun): a 57.4% average with 1 in 4 students below the pass line** — roughly 15 points below the same cohort's Science result. At section level, **Class 10 Section I lags every other division** in both core subjects. Detail follows by exam, section, and individual student.

Headline: Class 10 cohorts are performing strongly (76–81%). Priority action sits with **Class 12 Maths** (Relations, Inverse Trig, Matrices, Determinants) and **Class 10 Section I**.

Pass line = 40% (12 / 30 questions). Students below 40% are flagged by the CRM as “**Needs Review**”. All figures reconcile exactly to the CRM dashboard counts.

01 Programme overview — all 40 mock exams

The 40 mock exams span **28 Apr to 11 Jun 2026** and cover Class 10 (Maths & Science) plus a recent Class 12 set (Maths, Science, Physics). Five exams were assigned but drew **zero submissions** and are excluded from averages. Science papers are both the most numerous and the highest scoring; Physics appears only as two small Class 12 papers (13 attempts combined) and is the lowest scoring.

Subject	Exams (active)	Submissions	Weighted avg
Maths	15	911	73.2%
Science	18	917	76.6%
Physics	2	13	65.0%
All active	35	1,841	74.8%

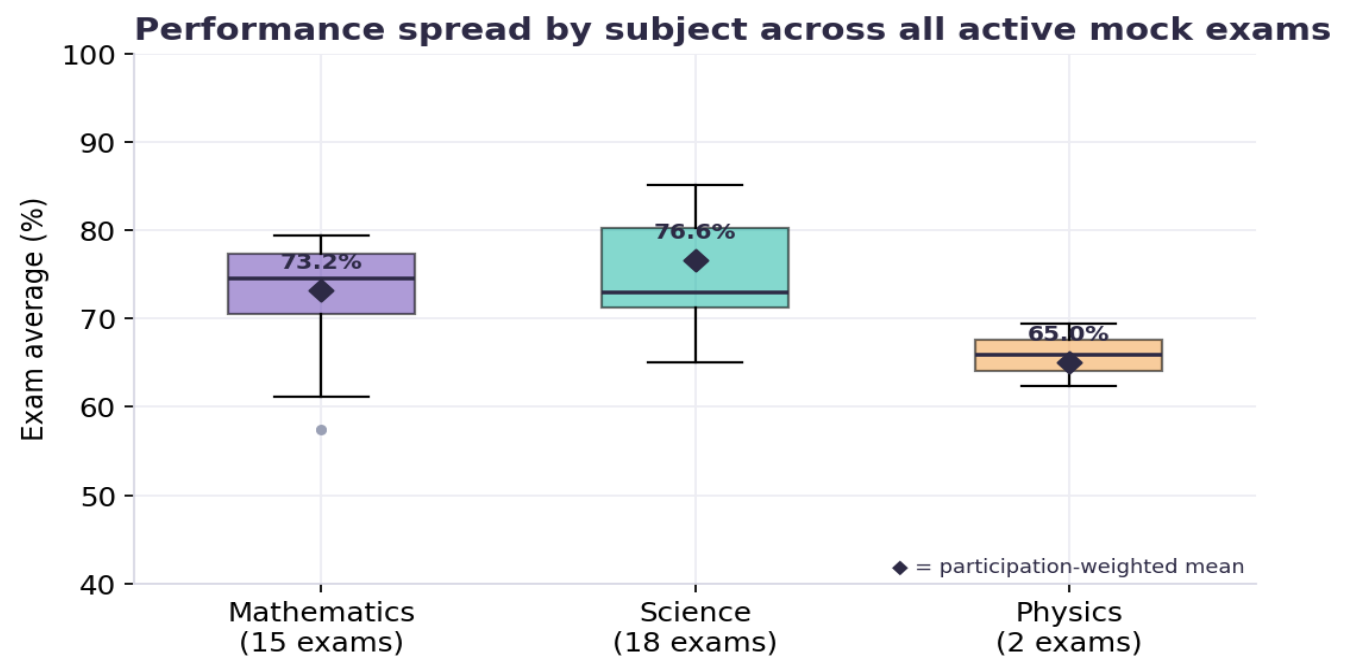

Figure 1 — Spread of exam averages by subject across all active mock exams. Box = middle 50% of exams; line = median exam; ◆ = participation-weighted mean.

Most recent activity

The newest papers (9–11 Jun) account for the bulk of recent attempts. The two 9 Jun Class 10 papers were taken by the same large cohort (227 students each). The 5 zero-submission exams are listed in the appendix.

Assigned	Subject	Code	Subs	Avg
11 Jun	Science	MOCK-514783	34	73.9%
11 Jun	Maths	MOCK-174522	20	57.4%
11 Jun	Physics	MOCK-662827	8	62.3%
11 Jun	Physics	MOCK-336339	5	69.4%
11 Jun	Maths	MOCK-786307	0	—
10 Jun	Maths	MOCK-652291	101	76.0%
10 Jun	Science	MOCK-384328	29	72.1%
10 Jun	Science	MOCK-593350	0	—

Assigned	Subject	Code	Subs	Avg
09 Jun	Science	MOCK-438949	227	80.7%
09 Jun	Maths	MOCK-742816	227	77.4%
08 Jun	Maths	MOCK-905318	98	78.1%
08 Jun	Science	MOCK-140568	95	81.5%
08 Jun	Maths	MOCK-711121	33	78.5%
08 Jun	Science	MOCK-971611	28	85.1%
08 Jun	Science	MOCK-548344	4	83.8%
08 Jun	Science	MOCK-859134	1	38.0%
08 Jun	Science	MOCK-950207	1	65.0%
08 Jun	Science	MOCK-954419	0	—

Table 2 — All mock exams assigned from 8 Jun onward (recent window).

02 Recent exams — the deep-dive (9–11 Jun)

Five recent papers were opened to individual-student level. Four sit comfortably in the 74–81% band; the outlier is **Class 12 Maths at 57.4%**, which also has the widest spread (std 26.8) and the most students needing review.

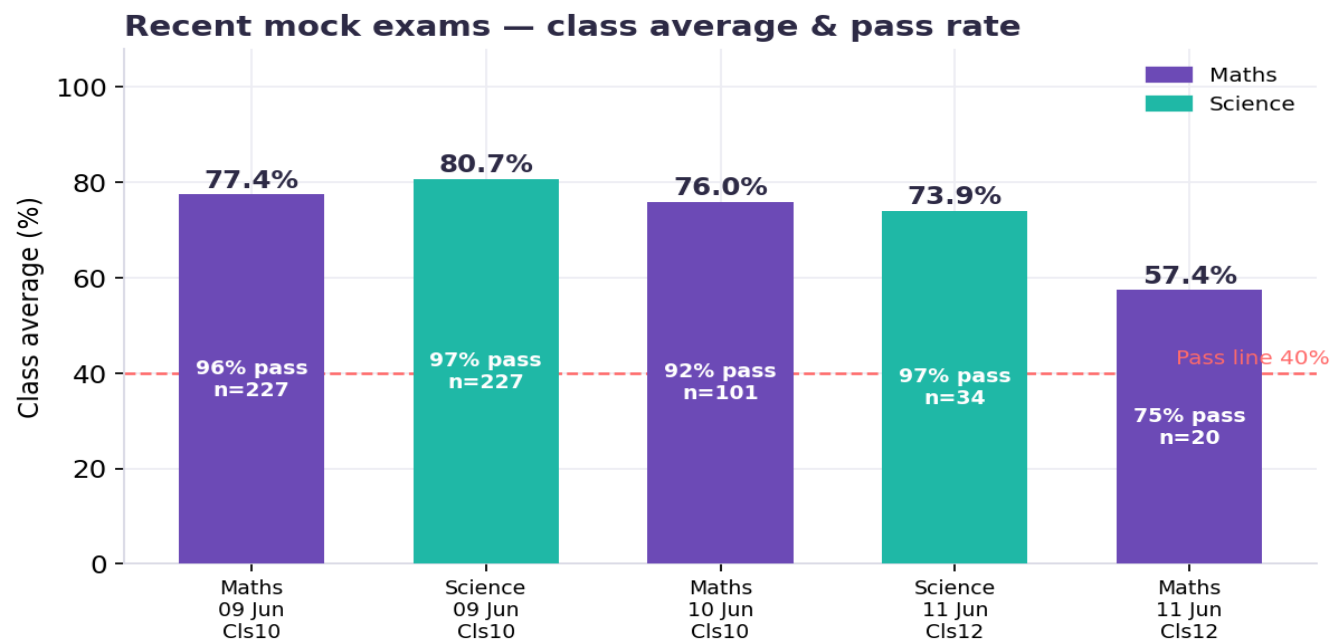

Figure 2 — Class average and pass rate for each recent exam. Dashed line = 40% pass threshold.

Exam	N	Avg	Median	Pass	Needs rev.	100%	Med. time
Mathematics · 09 Jun · Cls 10	227	77.4%	83	96%	10	21	12m
Science · 09 Jun · Cls 10	227	80.7%	83	97%	7	28	12m
Mathematics · 10 Jun · Cls 10	101	76.0%	80	92%	8	11	12m
Science · 11 Jun · Cls 12	34	73.9%	78	97%	1	1	19m
Mathematics · 11 Jun · Cls 12	20	57.4%	55	75%	5	1	11m

Table 3 — Per-exam summary. The highlighted row (Class 12 Maths) is the clear underperformer: lowest average, lowest pass rate, most “Needs Review”.

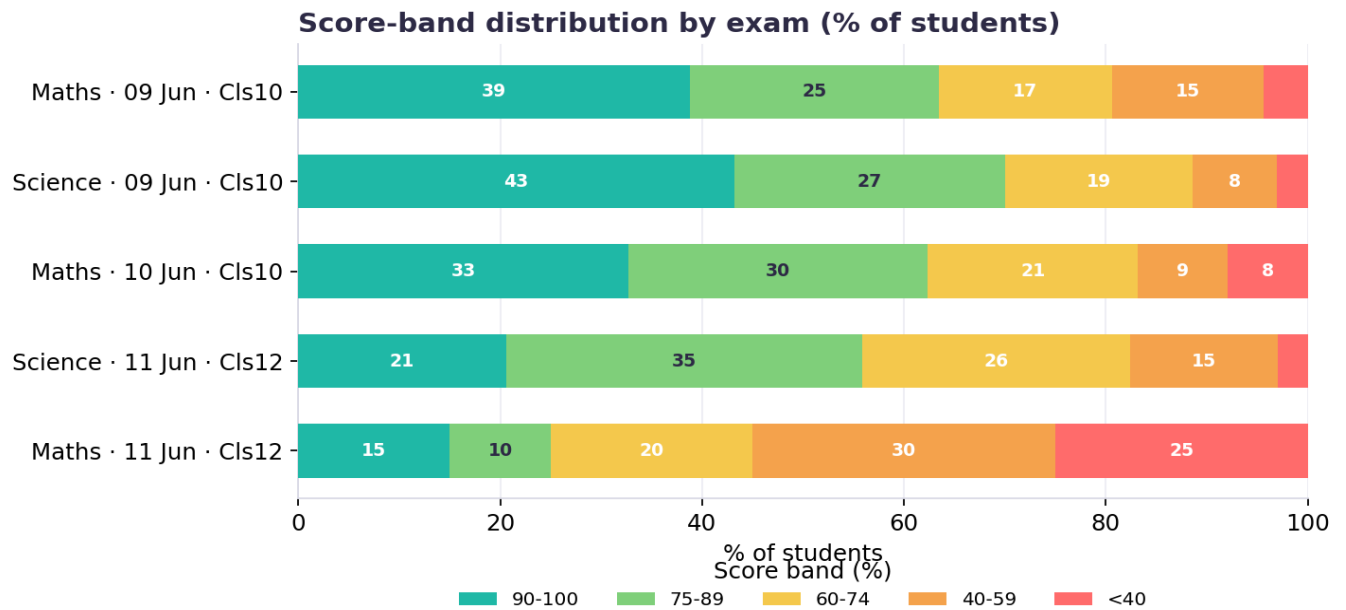

Figure 3 — How each exam's students distribute across score bands. Note the heavy red/orange tail on Class 12 Maths (55% of students at or below 59%) versus the green-dominated Class 10 Science paper.

03 Section & cohort patterns

Section-level view, 9 June (Class 10)

On the two large 9 June papers, sections C, B and A lead while **Section I trails in both subjects** (68.4% Maths, 71.3% Science — the lowest division in each). Sections are otherwise tightly bunched within ~8 points.

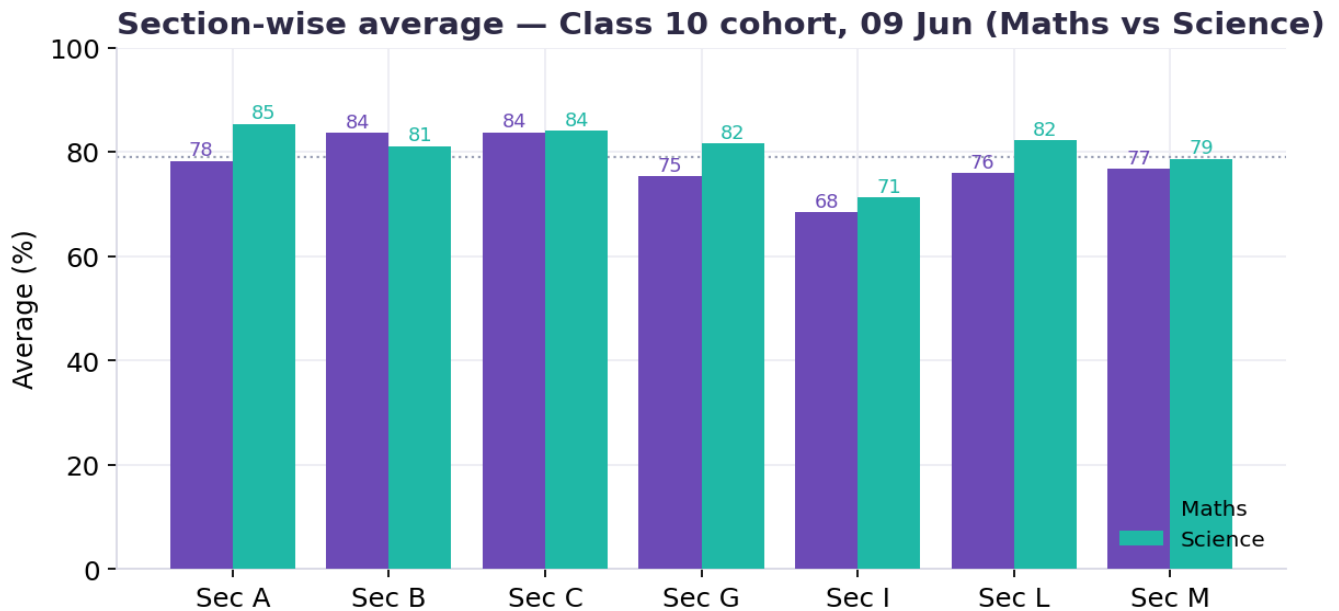

Figure 4 — Section-wise averages for the 9 June Class 10 cohort.

Class 12 — same students, two subjects

Seventeen Class 12 students sat both the 11 June Science and Maths papers. **Almost all scored markedly higher in Science** (cohort 71.9% vs 57.1% Maths). Several aced Science but collapsed in Maths — e.g. **Varad Srivastava 90% → 3%** and **Anushkha EL 100% → 33%** (both with most Maths questions left unanswered), pointing to a genuine content gap (or low effort) on Relations/Inverse-Trig/Matrices/Determinants rather than weak students.

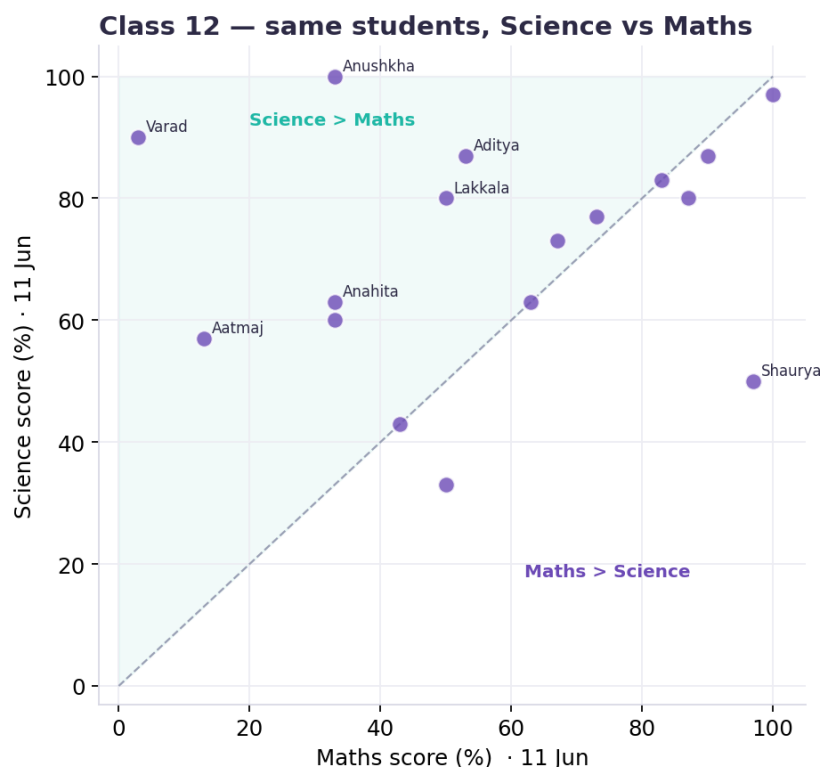

Figure 5 — Each dot is one Class 12 student. Points above the dashed line did better in Science than Maths; the cluster sits well above the line.

04 Engagement & integrity check

Submission times mostly look sensible (median 12–19 minutes). Two edge patterns are worth a glance — not necessarily problems, but useful to eyeball: very fast near-perfect scores, and very fast low scores (rushed / abandoned attempts).

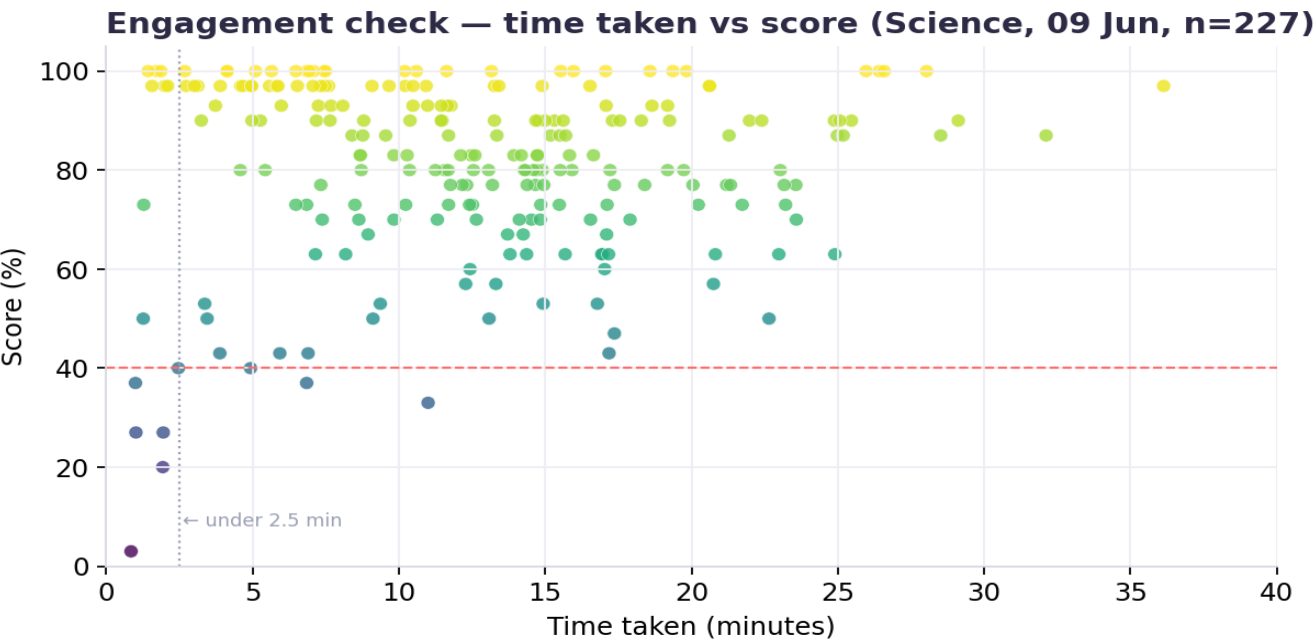

Figure 6 — Time vs score for the 9 June Science paper (n = 227). Most students cluster 5–25 min; a handful finish under 2.5 min.

Fast & near-perfect — Maths 9 Jun (≤2.5 min, ≥97%)

Student	Sec	Score	Time
Brijansh Makrand Ubale	L	100%	1m 38s
Aarush Deepak Hinge	L	100%	1m 39s
Shwedshree Chetan Kashid	G	100%	1m 46s
Aadhy Singh	C	100%	2m 9s
Sanvi Ashish Dasharathi	G	100%	2m 16s
Mahendra Somnath Vaidya	L	100%	2m 17s
Bhuvanesh Manohar Patil	C	100%	2m 29s

Rushed / abandoned — Maths 9 Jun (≤72 s, <50%)

Student	Sec	Score	Time	Blank
Avani Dixit	M	40%	38s	0
Arnav Kulkarni	M	40%	39s	1
Jwal Hiren Shah	L	40%	1m 3s	0
Aditya Pawar	B	37%	1m 8s	0

Tables 4–5 — Worth a quick look: seven students scored ≥97% in under 2½ minutes (very strong or worth verifying), while a few finished in under a minute with low scores. None are conclusive on their own.

05 Watch-list & recommended actions

Students below the 40% pass line on the recent papers (CRM “Needs Review”). These are the first calls for re-teaching or a re-test.

Exam	#	Students needing review (section, score)
Maths · 09 Jun · Cls 10	10	Amruta Parihar (I, 23%); Aarthikha EL (I, 27%); Sarvadnya Sunil Chavan (B, 27%); Dheer Chauhan (I, 30%); Dhanvi Bhardwaj (M, 30%); Mrunmayi Bapte (I, 33%); Veeraj Yudhvir Singh (M, 33%); Dhruti Hiteshkumar Patel (L, 37%); Aditya Pawar (B, 37%); Divya Deshmane (C, 37%)
Science · 09 Jun · Cls 10	7	Mohammed Farhan Muzamil Ustad (B, 3%); Swara Samir Pimpale (I, 20%); Aarthikha EL (I, 27%); Samiksha Mann (M, 27%); Bezawada Jai Sai Sushanth (G, 33%); Amruta Parihar (I, 37%); Swastik Bahadur (I, 37%)
Maths · 10 Jun · Cls 10	8	Abhinna Patil (K, 13%); Ishwari Swapneel Madhekar (O, 17%); Kaushal Shannkar Naruni (E, 20%); Shrey Bihani (O, 20%); Amruta Parihar (I, 23%); Rugveda Amol Londhe (E, 27%); Maitreyee Pankaj Deshmukh (K, 37%); Savit Pramanik (E, 37%)
Science · 11 Jun · Cls 12	1	Avani Suresh Shetty (B, 33%)
Maths · 11 Jun · Cls 12	5	Varad Srivastava (A, 3%); Aatmaj Abhijeet Chitriv (B, 13%); Anahita Gautam -Shirali (B, 33%); Syamantak J (A, 33%); Anushkha EL (A, 33%)

Table 6 — 31 “Needs Review” flags across the five recent exams (Class 12 Maths alone contributes 5 of 20 students).

Recommended actions

- **Re-teach Class 12 Maths** (Relations, Inverse Trig, Matrices, Determinants). At 57.4% with 25% of students below the pass line and several strong-in-Science students scoring <35%, this topic set needs a focused revision session and a re-test.
- **Target Class 10 Section I.** It is the lowest division in both 9 June papers (68% Maths / 71% Science). A short diagnostic on the common wrong answers would show whether it is a teaching-pace or attendance issue.
- **Follow up the 31 “Needs Review” students** in Table 6 individually — most are isolated low scores in an otherwise strong cohort, so quick intervention should lift them.
- **Sanity-check a few very-fast attempts** (Tables 4–5): under-1-minute submissions with many blanks suggest accidental or abandoned starts that could be reset; sub-2½-minute perfect scores are worth a quick verify.
- **Chase non-submissions.** Five assigned papers drew zero attempts and several recent papers have low turnout versus the ~227-strong cohort — worth confirming whether they were optional or missed.
